

2008 Original Song Spotlight

"Solution"

No place to turn, no place to run to
No person helps, what has this world come to?
No understanding about the issue
Simple, the answer is right there in you
A helping hand goes a long way in the end
Today's man down is tomorrow's best friend
Basic math, why the confusion?
Homelessness equals the problem, so love is the solution

What could you do to solve this issue?

What can we do to solve this issue?
Love and compassion, it's all so simple
It's up to us to aid a soul
And one day, who knows, we may change the globe
Whether, black or white, from the young to old
Our future is one everyone controls
UNITY - no one left alone
And together we can all build a healthy home

We have the right, we got to fight
They're the same as me and you
We must unite
Cuz now it's time to solve this issue

Imagine, the whole entire world at peace
No longer will the homeless roam the streets
A place to live with more than enough to eat
Finally feeling like a winner, faced enough defeat
It's not impossible, it can happen all today
Cooperate, if only we all would say:
"This ain't right, to stand by and see them fight till the point
where a soul screams 'this ain't life'"
Here's the chance, to change one's circumstance
from homeless man to sharp suit corporate man
from homeless woman to the E.R.'s top surgeon
It's more than a movie screen and drawn curtains
It's about trying to serve a purpose
Use the same brains we were born to Earth with
What can we do?
The solution's not lying around
No excuses the time is now

What could you do to solve this issue?
